

OmegaChoice DHA 80

OmegaChoice™ Concentrated EPA / DHA Omega-3s are a *superior* Omega-3 using proprietary technologies to produce the highest purity and most bioavailable Omega-3 formulations offered.

Additional patented beverage emulsion capabilities and nano-colloidal delivery systems further expand OmegaChoice functionality and potential applications.

Together with Twin Rivers Technologies, SourceOne provides a strong foundation to meet the growing consumer demand for higher omega-3 concentrations in novel forms.

Don't just buy any fish oil ... Choose a Superior Omega-3!

Purity & Quality

OmegaChoice removes heavy metals, environmental pollutants and oxidative impurities to ensure the highest quality omega-3 products. Higher purity and better stability with less odor and fishy taste afford broader applications, consumer appeal, and ultimately consumption.

OmegaChoice is Generally Regarded as Safe (GRAS) per FDA's Code of Federal Regulations (CFR 21) which guarantees the wholesomeness and safety of each ingredient for human consumption. GRAS is one of four legal categories set up by Congress under the 1958 Food Additives Amendment to the Federal Food, Drug, and Cosmetic Act (FD&C Act). Essentially, it is FDA's assurance that all ingredients used in food products have undergone extensive toxicological and safety testing to guarantee their safe use in foods.
